

# Design Spec

## 1. Summary

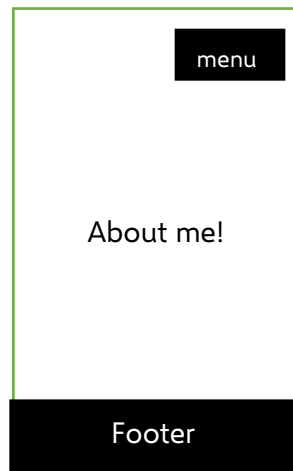

- a. I wanted the website to feel high-tech and modern. I wanted to show a sleek and modern design that emphasizes my computer science passion. But when It came to the content, I wanted to keep it simple and emphasize the content more than the design, hence the white prominence.
- b. The highlighting is also minimal and just emphasizes a clean, sleek, high-tech design. Just showing the main content and not emphasizing too much of the design but rather the content.
- c. I think this was the best choice as It again emphasizes what I can do more than showiness and creating a website that can be overwhelming if it contains too much design.
